building sustainable partnerships. ”

PROJECT OVERVIEW

1. Project Information

- Project Name : UI/UX Design for the Collaboration Section of Gamedia.id
- Company : PT Gamedia Asri Media
- Role : Outlet Maintenance Officer
- Project Type : Business Analysis & UI/UX Design
- Platform : Gamedia.id
- Section : Collaboration
- Modules : B2B Gamedia, Mitra Reseller Gamedia, Partnership Gamedia
- Responsibilities : Business Analysis, Requirement Gathering, UI/UX Design, Stakeholder Collaboration
- Duration : 1 Year
- Tools : Adobe XD
- Status : Successfully Implemented

2. Project Summary

The Collaboration section of Gamedia.id was developed to provide a centralized platform for businesses and prospective partners to explore collaboration opportunities with Gamedia. The project includes three key modules: B2B Gamedia, Gamedia Reseller Program, and Gamedia Partnership. As an Outlet Partnership Officer, I was responsible for analyzing business requirements, collaborating with stakeholders, and designing high-fidelity user interfaces using Adobe XD. The approved designs served as the primary reference for the external development vendor throughout the implementation process. The project was successfully launched as part of the Gamedia.id platform, with several layout refinements and feature adjustments made during development to align with the final business requirements.

3. Project Highlights

- Successfully implemented on Gamedia.id
- Designed 3 business collaboration modules
- Created high-fidelity UI designs in Adobe XD
- Conducted business requirement analysis and stakeholder collaboration
- Served as the primary design reference for the external development vendor

BUSINESS BACKGROUND

1. Business Context

Gamedia sought to strengthen its digital ecosystem by providing a dedicated collaboration section within Gamedia.id. The objective was to create a centralized platform where businesses, institutions, and prospective partners could easily explore collaboration opportunities, access relevant information, and understand the services offered by Gamedia.

2. Business Challenges

Business Challenge	Description
Intuitive User Experience	Create a simple and user-friendly interface that enables users to navigate and understand collaboration information with ease.
Clear Information Architecture	Organize extensive business information into a structured, readable, and visually appealing layout without overwhelming users.
Business Engagement	Design an engaging digital experience that builds trust and encourages prospective partners to explore Gamedia's collaboration opportunities.

3. Business Goals

- Centralize collaboration information within Gamedia.id.
- Improve accessibility for business partners and prospective collaborators.
- Strengthen Gamedia's digital collaboration ecosystem.
- Support business growth through digital engagement.

4. Target User

User Group	Primary Needs
Business Partners	Explore B2B collaboration opportunities.
Corporate Clients	Learn about corporate procurement solutions.
Prospective Resellers	Understand the reseller program and its benefits.
Potential Investors	Explore partnership opportunities with Gamedia.

5. Project Scope

Module	Purpose
B2B Gamedia	Introduce business procurement solutions for companies and institutions.
Mitra Reseller Gamedia	Provide information about reseller opportunities, benefits, and requirements.
Partnership Gamedia	Present partnership opportunities and collaboration models available through Gamedia.

ROLE & RESPONSIBILITIES

1. Role

Outlet Maintenance Officer

2. Responsibilities

- Gathered and analyzed business requirements from internal stakeholders.
- Collaborated with cross-functional teams to define website content and user requirements.
- Designed high-fidelity user interfaces for the Collaboration section using Adobe XD.
- Organized business information into a clear and user-friendly information architecture.
- Prepared design assets and specifications for the external development vendor.
- Participated in design review discussions and supported design refinements during implementation.
- Ensured the final implementation aligned with approved business objectives and user experience goals.

3. Skills Applied

- Business Analysis
- Requirement Gathering
- UI/UX Design
- Information Architecture
- Adobe XD
- Stakeholder Management
- Vendor Collaboration

DESIGN PROCESS

1. Design Process Flow

a. Business Requirement

Objective

Understand business goals, stakeholder expectations, and user needs for the Collaboration section.

Description

Conducted discussions with stakeholders to identify business objectives, define project scope, and gather requirements that would guide the overall design process.

b. Stakeholder Discussion

Objective

Align design direction with business expectations.

Description

Collaborated with internal stakeholders to validate requirements, review content, and ensure the proposed solution met business objectives before proceeding to the design phase.

c. Information Architecture

Objective

Structure content into a clear and logical user flow.

Description

Organized business information into intuitive content sections and navigation to improve readability and help users quickly find relevant collaboration information.

d. UI Design

Objective

Transform business requirements into user-friendly interfaces.

Description

Designed high-fidelity user interfaces in Adobe XD, focusing on usability, visual hierarchy, and clear presentation of business information.

e. Design Review & Feedback

Objective

Validate the proposed design before development.

Description

Presented the design to stakeholders, gathered feedback, and refined layouts and interface elements to ensure alignment with business requirements.

f. Vendor Handover

Objective

Support a smooth transition from design to development.

Description

Delivered the approved Adobe XD design files and provided design specifications and clarifications to the external development vendor.

g. Implementation

Objective

Ensure the implemented product reflects the approved design.

Description

Reviewed the implemented pages, discussed layout refinements with stakeholders and the vendor, and verified that the final product aligned with the agreed business requirements.

B2B GRAMEDIA MODULE OVERVIEW

1. Project Goal

The B2B Gramedia module was designed to provide businesses and institutions with a dedicated platform to explore corporate purchasing solutions and collaboration opportunities. The design focuses on presenting business information in a clear, structured, and engaging way while encouraging users to contact Gramedia for further collaboration.

2. Initial High – Fidelity Design

Key Design Decision	
Design Decision	Business Purpose
Clear content hierarchy	Improve information readability.
Structured content sections	Present large amounts of information effectively.
Strategic CTA placement	Encourage user engagement.
Professional visual appearance	Build trust and credibility.

3. Final Implementation

Final Implementation on Gramedia.id for B2B Gramedia Module

4. Implementation Note

The final implementation preserved the core content structure and user experience while introducing several layout refinements and visual adjustments based on stakeholder discussions and technical considerations.

MITRA RESELLER GRAMEDIA MODULE OVERVIEW

1. Project Goal

The Mitra Reseller Gramedia module was designed to introduce the reseller program and provide prospective resellers with clear information about its benefits, requirements, and registration process. The interface focuses on presenting structured information that helps users understand the program and encourages them to join as Gramedia resellers.

2. Initial High – Fidelity Design

Key Design Decision

Design Decision	Business Purpose
Structured information layout	Help users understand the reseller program quickly.
Clear benefit sections	Highlight the value of joining the reseller program.
Consistent branding	Maintain trust and brand identity.
Prominent call-to-action	Encourage prospective resellers to take the next step.

3. Final Implementation

Final Implementation on Gramedia.id for Mitra Reseller Gramedia Module

4. Implementation Note

The implemented design retained the original information structure while introducing minor layout refinements and visual adjustments following stakeholder discussions and development requirements.

PARTNERSHIP GRAMEDIA MODULE OVERVIEW

1. Project Goal

The Gramedia Partnership module was designed to showcase partnership opportunities and provide comprehensive information for organizations interested in collaborating with Gramedia. The interface emphasizes clarity, credibility, and easy access to partnership information while supporting business engagement.

2. Initial High – Fidelity Design

Key Design Decision	
Design Decision	Business Purpose
Clear Information Hierarchy	Organize partnership information into a logical structure, allowing users to quickly understand available collaboration opportunities.
Professional & Trustworthy Visual Design	Reinforce Gramedia's brand credibility and build confidence among prospective business partners.
Content-Focused Layout	Present comprehensive partnership information in a structured format without overwhelming users, improving readability and user engagement.
Strategic Call-to-Action Placement	Encourage users to contact Gramedia or explore partnership opportunities after understanding the available information.

3. Final Implementation

Final Implementation on Gramedia.id for Partnership Gramedia Module

4. Implementation Note

The final implementation preserved the overall layout and content of the approved design. Following stakeholder discussions, the simulation feature was removed, and several layout adjustments were introduced to better align with business priorities and technical considerations.

DESIGN EVOLUTION

Module	Design Evolution	Reason For Change
B2B Gramedia	Minor layout refinements and visual adjustments while preserving the original content structure and user flow.	Improve consistency with the overall Gramedia.id interface and enhance usability.
Mitra Reseller Gramedia	Layout and content spacing were refined during implementation while maintaining the approved information structure.	Align the design with stakeholder feedback and development standards.
Partnership Gramedia	The simulation feature was removed, and several layout adjustments were introduced while preserving the core content.	Reflect updated business requirements and implementation considerations.

PROJECT OUTCOME

1. Overview

The Collaboration section was successfully implemented as part of the Gramedia.id platform. The project delivered three business-focused modules that support corporate collaboration, reseller engagement, and partnership opportunities. The approved UI designs served as the primary reference for the external development vendor throughout the implementation process.

2. Key Outcome

Outcome	Description
Successful Implementation	The approved UI designs were successfully implemented as part of the Gramedia.id platform.
Business-Focused Solution	Delivered three dedicated collaboration modules to support Gramedia's business initiatives.
Vendor Design Reference	The Adobe XD designs served as the primary reference for the external development vendor during development.
Cross-Functional Collaboration	Worked closely with stakeholders and the external vendor to refine the implementation while preserving the original design intent.

3. Project Impact

- Established a centralized collaboration section within Gramedia.id.
- Improved accessibility to business collaboration information.
- Supported Gramedia's digital business initiatives.
- Delivered a structured and user-friendly interface for prospective business partners.

LESSONS LEARNED

1. Key Learnings

Lesson	What I Learned
Business-Driven Design	Effective UI/UX design begins with a clear understanding of business objectives and stakeholder needs.
Information Architecture	Organizing large amounts of information into a logical structure improves readability and user comprehension.
Stakeholder Collaboration	Continuous communication with stakeholders helps ensure the design aligns with evolving business requirements.
Vendor Collaboration	Clear documentation and design specifications facilitate smoother implementation by development teams.
Iterative Improvement	Refining the design based on feedback and technical considerations leads to a more practical and implementable solution.

2. Personal Reflection

This project strengthened my ability to bridge business requirements and user experience through structured problem-solving and cross-functional collaboration. It also enhanced my communication skills while working with stakeholders and external vendors to deliver a practical digital solution aligned with business objectives.

3. Skills Strengthened

- Business Analysis
- Requirement Gathering
- UI/UX Design
- Information Architecture
- Adobe XD
- Stakeholder Management
- Vendor Collaboration
- Design Documentation
- Design Review
- Problem Solving
